PROFESSIONAL SUMMARY

I'm a rising junior at the University of Washington majoring in Computer Science. I am passionate about applying my knowledge of programming and problem-solving to real-world applications. My interests include software engineering, machine learning, and building user-friendly tools. I thrive in team environments where I can contribute ideas and also value independent problem-solving. I am seeking opportunities through internships or research to strengthen my technical skills and prepare for a career in technology.

EDUCATION

The University of Washington, Tacoma, WA

Bachelor's in Computer Science

Expected Graduation June 2027

EXPERIENCE

Seola Gardens Technology Center, Seattle WA

June 2025 – September 2025

Volunteer

- Taught 7+ learners of varying skill levels in programming, and game development, adapting lessons to improve engagement and comprehension.
- Created interactive Java and Python coding lessons tailored to students with varying levels of programming experience.
- Introduced supplemental coding projects (e.g., mini-games, problem-solving exercises) that increased participation and boosted student confidence.

Voters App(Startup), Seattle, WA

May 2024 - August 2024

Software Engineer Intern

- Reduced bug backlog by 15% by testing software, fixing defects, and documenting processes.
- Developed a responsive interface that improved navigation and usability, giving non-technical users a smoother experience.
- Collaborated with cross-functional teams to roll out new features and resolve technical issues, improving user experience and reducing reported issues by over 5%.

SeaTac Wireless, Seattle, WA

November 2022 - June 2023

Service Technician

- Resolved 90%+ of mobile device and computer support tickets within 24 hours via phone, email, and in-person support.
- Assisted with installation, configuration, and troubleshooting of software applications.
- Carried out hardware repairs (hard drives, RAM, screens, batteries), completing an average of 5+ successful replacements weekly and reducing service wait times for end-users.

PROJECTS

Speech-to-Text Transcription Program

- Built a web application using React and JavaScript that lets users upload audio files and receive text transcripts.
- Connected to an API backend with Python (FastAPI) to process audio and generate downloadable transcripts.
- Added secure file handling and cloud support to make the tool reliable, user-friendly, and efficient.

TECHNICAL SKILLS

- Proficient in Java, Python; Familiar with C, C++, and SQL
- Frameworks/Tool: Javascript, React, Git, FastAPI
- Excellent computer skills, including MS Office, Cloud storage tools
